

BELT SORTING TABLE

SORTING MADE SIMPLE

Composition of the belt sorting table

- ▶ A self-supporting 304 stainless steel chassis.
- ▶ A smooth 800 mm wide belt.
- ▶ A custom mechanism for loosening and tightening the belt in a matter of seconds.
- ▶ Tilting banks to simplify cleaning.
- ▶ A geared motor with an electronic variator for adapting the speed of the belt to the type of work to be carried out.
- ▶ A reception hopper for the harvest.
- ▶ A belt scraping device.
- ▶ All stainless steel components are supplied with a microblasted finish.
- ▶ Waste bins can be removed instantly and without tools.

The advantages when cleaning

The self-supporting stainless steel chassis is specially designed to eliminate any recesses that would make cleaning difficult. The banks forming the sliding surface, held in the working position by stainless steel latches, can be tilted in order to facilitate rinsing between two feeds.

Stainless steel clips allow the belt to be slackened for better entry of a water jet during quick washes. For a complete washing at the end of the day or at the end of the season, simply unhook the two ends of the belt to remove it.

The user can dismantle the table into pieces in one minute and it takes no more than two minutes to reassemble it.

LESS EFFORT, MORE COMFORT

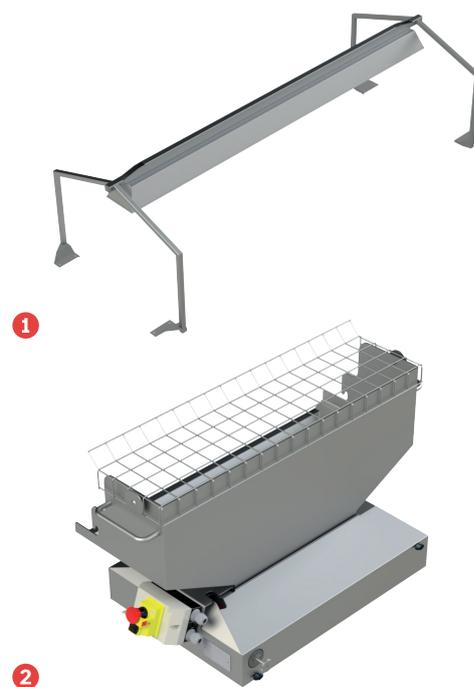

- ▶ The globalization of the sorting activity pushed to the point of waste collection.
- ▶ Easy to clean.
- ▶ Easy to dismantle.
- ▶ Workstation ergonomics.
- ▶ A streamlined kinematic chain.

OPTIONAL EQUIPMENT

1 LED light rail

2 Removable crusher

- ▶ Large suspended crusher with custom hopper.
